Growing 2ajar with Alex Hormozi's principles

A practical playbook: the offer, getting leads on both sides, what to build next, and a 90-day plan.

> These are paraphrased principles from Alex Hormozi's books *$100M Offers* and *$100M Leads*, applied to 2ajar. 2ajar has no affiliation with him. The numbers in this plan are targets to test, not results.

1. The ideas we're borrowing (one page)

Starving crowd first

Market beats offer, offer beats persuasion. Lebanese renters struggling to find a decent flat with predictable bills are a starving crowd. So are brokers drowning in time-wasting WhatsApp calls.

The value equation

People pay for (and switch to) what raises the top and shrinks the bottom:

$$\frac{\text{Dream outcome} \times \text{Perceived likelihood of getting it}}{\text{Time delay} \times \text{Effort \& sacrifice}}$$

Grand Slam Offer

An offer so good people feel stupid saying no: solve every obstacle on the way to the dream outcome, then add bonuses, a guarantee, scarcity, urgency and a clear name.

The Core Four (+ lead getters)

Only four ways to get leads: **warm outreach, cold outreach, content, paid ads**. Then multiply with others who bring leads: **referrals, employees, agencies, affiliates**.

Rule of 100

Do 100 primary actions a day (messages, posts, minutes of content, dollars of ads) until it works. Volume beats cleverness at the start.

More → Better → New

First do **more** of what works, then make it **better**, and only then try something **new**. Most early teams do the opposite.

Lead magnets

Give a small, complete solution to a narrow problem for free, so people raise their hand. It should naturally lead to your core offer.

Do things that don't scale

Hand-hold the first customers: list their properties for them and call them weekly. Learn, then automate.

2. Two-sided marketplace: win supply first

Renters come only if good, fresh listings are there, so **owners and brokers come first**. The first 60 days are about getting **300+ real, fresh apartment listings in Beirut and Metn**, which is enough for a renter to find several matches for a typical search. Demand marketing scales only after that.

The value equation for each side

	Renters (demand)	Owners & brokers (supply)
Dream outcome	"A flat I like, where I know the real monthly cost (rent + generator + water) and the area is safe and quiet. No surprises."	"Serious tenants who already know the price, area and bills, so I sign faster and stop answering 50 'how much?' messages."
Perceived likelihood (raise it)	Fresh listings (owners confirm they're still available) · real bills · area facts with a source · "not reported" instead of guesses · verified badge (to build)	Leads come with name, phone, message and consent · listing stats (to build) · case studies from the first brokers · the founding-partner guarantee
Time delay (cut it)	Instant answers to a plain sentence · WhatsApp in one tap · alerts for new matches (to build)	Live within 48 hours because we do the setup · lead notifications (Telegram/WhatsApp) right away
Effort & sacrifice (cut it)	No account to browse · Arabic first · Arabizi understood · filters only if you want them	We upload their inventory from photos or a spreadsheet · CSV import · free during beta

> Already built: plain-language search, real bills, area facts, freshness, consented leads, CSV import, Telegram alerts. Marked "to build": the next product steps in section 5.

3. The Grand Slam Offer for brokers and owners

"2ajar Founding Partners" · شركاء إيجار المؤسسون

Piece	What we offer	Obstacle it removes
Core	Your whole rental inventory on 2ajar, **free for the founding period**, in Arabic and English, found by plain-language search.	"Another platform costs money."
Done-for-you setup	Send us your listings on WhatsApp (photos + voice note or Excel). **We publish them within 48 hours.**	"I don't have time to upload."
Bonus 1	**Verified Founding Partner badge** on every listing (to build: B-055 verification flag).	"Renters don't trust brokers."
Bonus 2	**Monthly performance report**: views, WhatsApp clicks, leads per listing (B-060).	"I don't know if it works."
Bonus 3	**Featured spot** in the home page rows ("Popular homes in Achrafieh") for the first month.	"Nobody will see my listings."
Bonus 4	**Professional photos** for your 3 best apartments (budget needed; optional).	"My photos are bad."
Guarantee	"If your listings get **fewer than 10 serious inquiries in 60 days**, we extend your founding benefits **12 more months** and personally review every listing with you."	"I'll waste my effort."
Scarcity	**Only 30 founding partners** (first 20 in Beirut, 10 in Metn/Keserwan).	Gets a decision now, not "later".
Urgency	Founding benefits and a **locked future price** (when pricing starts, see Q1) for anyone joining before a set date.	

> Before promising it: check that the guarantee is something we can always honour (extending free benefits costs us little), budget the photos, and decide the future pricing model (open question Q1 in DECISIONS.md). Never promise a number of tenants.

Offer for renters (free, so the "price" is their time and trust)

- **Lead magnet 1, "The real cost of renting in Beirut 2026"**: a one-page guide per area with typical rent per m², generator subscription costs and water arrangements, built from 2ajar's own data and clearly sourced. Get it free by leaving a WhatsApp number (with consent) for new-listing alerts.
- **Lead magnet 2, a "Rental checklist" (Arabic)**: the 15 questions to ask before signing (amps, generator hours, water source, deposit, broker fee, contract registration).
- **"Ask 2ajar" anywhere**: share a sentence and get matches. The home-page search already does this; a WhatsApp version is a later step.

4. Getting leads: the Core Four, for each side

Warm outreach start day 1

List everyone you know who owns a flat, manages buildings or is a broker (family, friends, colleagues, building *natours*). Aim for 100 names. Message 20 a day and follow up after 2 days.

> مرحبا [الاسم]! عم نطلق «إيجار»، موقع جديد للإيجارات بلبنان. الناس بيكتبوا شو بدهن بكلمات عادية (مثلاً: «شقة بغرفتين بالأشرفية مع كهرباء 24/24») وبيطلعلهم الشقق المناسبة. عم نختار 30 شريك مؤسس: منحطّلك كل شققك مجاناً خلال 48 ساعة، بس ابعتلي الصور عالواتساب. بتعرف حدا عنده شقة للإيجار؟
>
> "We're launching 2ajar... we're choosing 30 founding partners; we'll put all your flats online for free within 48 hours, just send me the photos on WhatsApp. Know anyone with a flat for rent?"

Cold outreach week 1 →

- Find brokers and owners who already advertise: Facebook groups, Instagram real-estate pages, OLX, building signs ("للإيجار"). Contact them **manually and personally**: no scraping or copying their listings without permission.
- Rule of 100: **100 personal messages a day** (two people × 50). Track replies in a simple sheet: contacted, replied, call booked, listings received, live.
- Lead with **their** listing: "I saw your 2-bedroom in Badaro. Want it on 2ajar for free, live by tomorrow, with renters who already know the price and bills?"
- Follow up 3 times (day 2, day 5, day 10). Most replies come after the second message.

Content week 2 →

Format	Idea (Arabic first)	Rhythm
Reels / TikTok	"What $700 rents you in Hamra vs Jdeideh" · "Generator bills: what to ask before you sign" · "3 questions before renting in Beirut" · walk-throughs of real listings (with owner permission)	1 a day
Carousels	Area cards from 2ajar's data: average rent, quiet and safety notes, garbage collection (with source and date)	3 a week
SEO pages	"Apartments for rent in Achrafieh" pages per area, generated from live listings + the area profile (to build)	once, then automatic
Broker stories	Short case studies: "Rami listed 12 flats, got 31 inquiries in a month" (only with real numbers and permission)	2 a month

Paid ads after day 45

Only after organic content shows which hooks work. Start small (around $10–20/day, an assumption to test) on Meta, targeting Beirut and Metn, with the best-performing reel. Send traffic to a specific search ("furnished 2-bedroom in Achrafieh"), not the home page. Measure the cost per WhatsApp click and per lead, and stop anything that doesn't beat the organic baseline.

Lead getters (multipliers)

- **Referrals**: brokers who bring another broker get an extra featured month; renters who found a flat get a "share 2ajar" message to forward.

- **Affiliates**: university housing offices (AUB, LAU, USJ), NGOs and companies relocating staff, expat groups. Give them a co-branded search link.
- **Agencies**: a broker agency with 10 agents is 10× one broker. Offer the agency admin view (already built: agency admins see all agents' listings).

5. What to build next, ranked by the value equation

Each item names the part of the equation it moves. Items with a backlog code are already planned in `docs/BACKLOG.md`.

#	Build	Why (value equation)	Size
1	**Go live**: real listings in, demo mode off, real area facts entered for the first 10 areas	Likelihood: everything shown is real	Ops
2	**"All-in monthly cost"** on cards: rent + reported generator + water ("$950 + ~$110 bills")	Dream outcome: no surprises; unique vs other sites	S
3	**Saved searches and alerts** on WhatsApp / e-mail for new matches	Time delay: renters hear first; brings them back	M
4	**Broker stats**: views, WhatsApp clicks, leads per listing + monthly report (B-060)	Likelihood for brokers: proof it works; powers the guarantee	M
5	**Verified badge** (owner and broker verification by staff, Q2)	Likelihood for renters	S
6	**Lead workflow**: new / contacted / visited / signed / spam + notes (B-053)	Effort for brokers; tells us real outcomes	M
7	**Area guide pages** for SEO, plus the "real cost of renting" lead magnet	Content engine; free demand	M
8	**Reminders to confirm availability** (freshness worker, B-051) by WhatsApp	Likelihood: no dead listings	S
9	**Duplicate detection and moderation queue** (B-052, B-050)	Trust once volume grows	M
10	**Report a listing** for visitors (B-055)	Trust; cleans the marketplace	S
11	**Monetisation test**: featured listings or a broker subscription (Q1, Q7)	Only after brokers see value from #4	M

> Not now (owner decision): booking calendar. Later: guest reviews, once there are real stays to review.

6. The scoreboard

One number for everyone: **serious inquiries delivered to owners and brokers per week** (leads + WhatsApp clicks). It only grows if both sides work.

Funnel step	Metric	Day-30 target	Day-90 target
Supply	Live, fresh rental listings (confirmed in last 30 days)	150	600
Supply	Active founding partners (brokers / owners with ≥1 live listing)	15	30 + 50 owners
Demand	Weekly visitors who search	500	5,000
Activation	% of searches that open a listing	40%	50%
Conversion	% of listing views that contact (WhatsApp or lead)	5%	8%
North star	Serious inquiries per week	50	400
Retention	Partners still active after 60 days	n/a	70%

> Targets are starting guesses to calibrate in week 2. The admin "platform stats" and the logged search queries already provide part of this; broker stats (#4) completes it.

7. The 90-day plan

Days 1–30: supply sprint ("do things that don't scale")

- Week 1: finalise the Founding Partner offer (guarantee wording, end date). Warm list of 100 names. 20 warm + 50 cold messages a day. Enter real area facts for Hamra, Achrafieh, Mar Mikhael, Badaro, Verdun, Jdeideh, Dbayeh, Antelias, Sin El Fil, Hazmieh.
- Week 2: onboard the first 10 partners by hand (we upload via CSV import). Build #2 (all-in monthly cost).
- Week 3: reach 100 live listings. Switch off demo mode in Beirut. Start daily content (1 reel a day).
- Week 4: reach 150 listings and 15 partners. Build #5 (verified badge). First weekly scoreboard review.

Days 31–60: demand and proof

- Build #3 (saved searches and alerts) and #4 (broker stats and monthly report).
- Publish the "real cost of renting" lead magnet; area carousels 3× a week.
- Affiliate outreach: 3 universities, 5 NGOs or companies; give each a co-branded search link.
- Send partners their first monthly report. Collect 3 real case studies (with permission).
- **More**: double the outreach channel with the best reply rate.

Days 61–90: multiply

- Referral program live (featured month for each broker referred).
- Start paid ads with the 2 best reels; cost-per-lead target set from organic results.
- Build #6 (lead workflow) and #7 (area SEO pages).
- Expand to Keserwan (Jounieh, Kaslik, Zouk) and Baabda with the same playbook.
- Monetisation test (#11) with 5 willing partners: featured listings or a simple monthly plan; founding partners keep their locked price.

8. Honest risks and guardrails

- **Chicken-and-egg**: don't spend on renter ads before supply is real. The scoreboard decides.
- **Trust is the product**: never invent listing details, reviews or area numbers. Keep "not reported" and sources visible.
- **Privacy**: leads only with explicit consent (already enforced); WhatsApp alerts only for people who opted in.
- **Content rights**: only publish photos and listings that owners or brokers gave us, never copied from other sites.
- **Payments in Lebanon** (Q7) are hard: start with simple invoicing or cash/Whish, and automate later.
- **Focus**: apartments by the month in Beirut and Metn first. Chalets and hourly rentals are a later wedge, not the launch.
